

## Technical Data Sheet

Item Description	
Edmac reference	3004039861
OEM reference	575051062P

Technical Specifications	
Element Model	BOGE 1/80 A
Dimensions and weight (according to dimensional drawing)	N 3575.0512
Connections	G 1½
Weight	5.5 kg
Width / depth / height (without differential pressure gauge)	130 / 130 / 515 mm
Flow rate at 20 °C, 1 bar and operating pressure 7 bar	7.83 m³/min
Differential pressure when new	0.03 bar
Residual oil content when new with upstream microfilter	0.003 mg/m³
Permissible operating pressure, maximum	16 bar

- To bind flavors and smells
- The activated charcoal filter is installed downstream of the FP microfilter
- The efficiency in connection with the micro filter is 99.9999%, based on particles larger than 0.01 µm
- Residual oil content of the compressed air up to 0.005 mg/m³
- Aluminum housing with threaded connections
