

The World of Edmac: OEM & Equivalent Compressor Spare parts.

Replacing the right part at the right time is what guarantees the performance and life span of your machine. At Edmac Europe we understand that and we believe that each part matters: the part you need today to fix a breakdown, the part you need tomorrow for your next service job and any part you want to stock for the future.

Working with Edmac Europe means that you have one supplier who supports you with the parts and services you need in your compressor room. Edmac Europe has wide selection of **air compressor, filtration, and vacuum pump spare parts.**

Everything we do, is driven by that purpose: to be part of your business and to make compressor parts business easy.

Complete range for air compressors & vacuum pumps

The selection of products is accurate and derives from daily contacts with the main market players determining high quality standards and high performances. Thanks to strong partnerships with leading manufacturers, the Edmac Europe's range consists of original, after market & Edmac equivalent spare parts.

Edmac items: reliable & efficient parts

As a true service partner we understand your need for reliable and efficient quality air solutions. The house brand Edmac offers an accessible range of products that meet or exceed their OEM counterparts. With a complete range of more than 12000 products, Edmac items meet the daily needs of every customer for the entire compressor room.

We supply air compressor, filtration and vacuum pump spare parts and much more. We maintain a state-of-the-art inspection and testing facility where all parts are checked for proper performance and fit. Every part we sell must pass a rigid and thorough incoming inspection process.

Our vast portfolio of Edmac products continues to develop daily, expanding our scope and improving availability. Let us become part of your business.
